Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Start Your Own Personal Library on Microfiche

A small investment can provide you with your own personal library of over 1400 documents addressing the hottest topics in education over the past eight years. Each year you can add to this personal library (at minimal cost) an additional hundred plus documents to keep you current with developments in the field of education.

Each year the 16 clearinghouses comprising the ERIC (Educational Resources Information Center) network publish information analysis products (IAP's) which analyze and synthesize for practitioners the current thinking on high-interest topics of the day, as reflected

in the education literature. These IAP's have been reproduced on microfiche, packaged in Mini-Files for easy retrieval and storage, and made available to educators at an economical price. Included with each Mini-File is a publication that provides abstracts of all the IAP's in that year's Mini-File and a series of indexes for locating the IAP's by subject, author, and institution.

You can order all the IAP's produced during a single year, (with the exception of those for 1975-1977, which have been combined in one Mini-File) or the complete set of six Mini-Files spanning the past eight years (1975-1982).

From the 1982 Mini-File Collection, for example, read what the literature is saying about:

- Collective Bargaining, Strikes, and Financial Costs in Public Education
- Counseling for Stress Management
- Recommended English Language Arts Curriculum Guides, K-12
- Computer Literacy in Higher Education
- Effects of Teacher Behavior on Preschool Children: A Review of Research
- Career Education: Collaboration with the Private Sector
- Calculators, Computers, and Classrooms
- Error Correction Techniques for the Foreign Language Classroom
- Student Alienation, Student Behavior, and the Urban Schools
- Computer Systems for the Urban School Administrator: A Guide for Decision Making
- Strategic Planning, Management, and Decision Making
- Alternative Programs for Disruptive Youth
- Lifelong Learning: Formal, Nonformal, Informal, and Self-Directed

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education, U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CJIE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including

Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as \$20 for some individual documents.

*Many of these documents are also valuable tools for computer searches.
